

⚡ MIGRATION ASSESSMENT & STRATEGY

# Discover OpenShift.

## Scaling Container Agility with Australian Expertise

Application containers enable modern organisations to distribute software with speed and resilience. **Red Hat OpenShift** provides the enterprise-ready system to run these workloads at scale. As an **Australian Red Hat Advanced Partner**, **kestreleight** helps you prioritise requirements and define a high-level plan for a successful implementation.

### THE IMPLEMENTATION PROCESS

PHASE 01

**DEFINE GOALS**

Finalise scope and business objectives.

PHASE 02

**TECHNICAL AUDIT**

Review platform, storage, and identity.

PHASE 03

**WAVE PLANNING**

Workload analysis and migration waves.

PHASE 04

**STRATEGIC PACK**

Architecture, ROI, and Execution Map.

### STRATEGIC STAKEHOLDER COLLABORATION

**TARGET PLATFORM STRATEGY**

Bare metal, ROSA, Azure (ARO), or Hybrid Cloud.

**ENVIRONMENT DEFINITION**

Mapping production and non-production topologies.

**INFRASTRUCTURE TOPOLOGY**

Auditing networking and software-defined storage.

**GOVERNANCE & IDENTITY**

Identity management and IAM integration needs.

**SOVEREIGN SECURITY**

Alignment with Essential Eight and ISM controls.

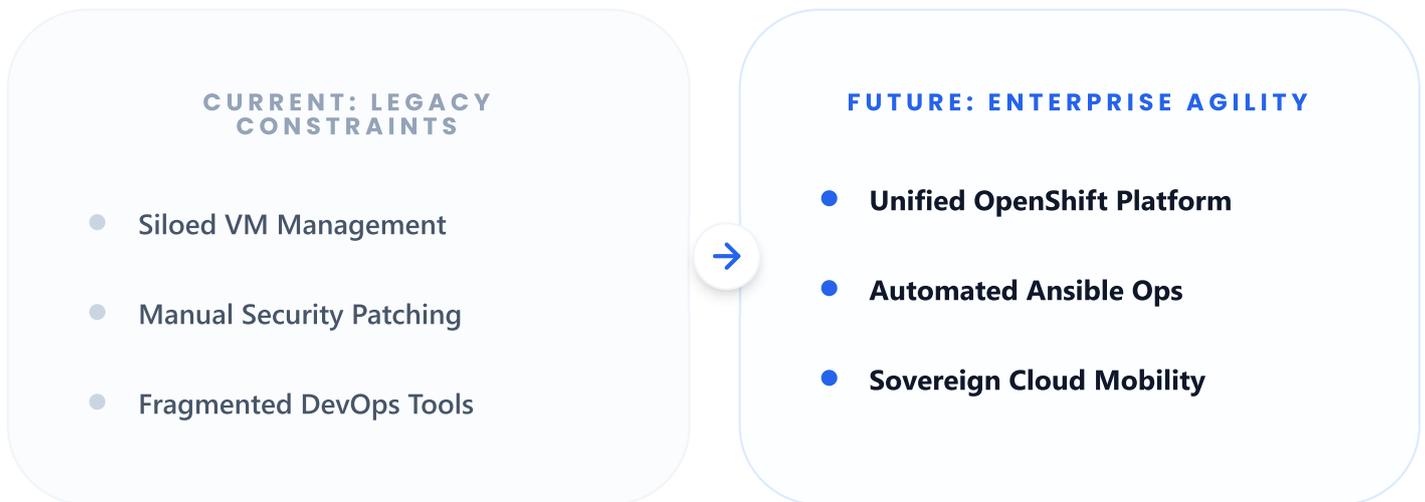

**OPERATIONS LIFECYCLE**

Logging, monitoring, and AIOps alerting needs.

# Strategic Transformation Matrix

Moving to **OpenShift** is an evolution from siloed, manual infrastructure to a unified hybrid cloud platform. We visualise your journey from legacy constraints to future agility.

## Migration Wave Analysis

We audit your target applications to understand potential migration intensity and modernisation requirements. This ensures we identify high-yield targets first.

### Technical design & wave roadmap

The final discovery outpour provides a prioritized wave plan and technical design (TDD) that moves you from "Discovery" to "Active Implementation" in 20 business days.

# Strategic Investment Menu

Our discovery offerings are tiered to match your organisational maturity and technical complexity. We focus on high-yield modernisation targets.

RECOMMENDED

TIER 1: DISCOVERY

**FREE**

INITIAL FEASIBILITY

- ✔ High-Level Audit
- ✔ Gap Analysis
- ✔ Pilot Strategy

TIER 2: FAST  
START

**\$15K** +GST

EXECUTION WAVES

- ✔ Architecture (TDD)
- ✔ Wave Schedule
- ✔ Licensing Review

TIER 3:  
MODERNISE

**\$25K** +GST

FULL MIGRATION

- ✔ Compliance Audit
- ✔ DevOps Coaching
- ✔ ROM Estimates

## ABOUT KESTRELEIGHT

Using **Red Hat OpenShift**, **kestrel**eight help organisations exploit cloud-native design approaches and automated DevOps processes to migrate, modernise, and accelerate application delivery.

As Australia's strategic partner for high-impact **Red Hat** consulting, we design and support mission-critical platforms with an outcome-driven delivery approach. We deliver clean solutions that just work.
